

Appendix A

Likert scale questionnaire

1 = Strongly disagree

2 = Disagree

3 = Neutral

4 = Agree

5 = Strongly agree

Hand Tracking

- “The hand tracking felt accurate.”
- “Interacting with objects felt natural.”

Efficiency

- “I was able to complete tasks without frustration.”
- “The system responded quickly to my actions.”

Comfort

- “Using hand tracking was physically comfortable.”
- “I did not feel fatigued.”

Immersion

- “I felt immersed in the virtual environment.”
- “The experience felt realistic.”

Ease of Use

- “The system was easy to use.”
- “I quickly understood how to interact with the environment.”

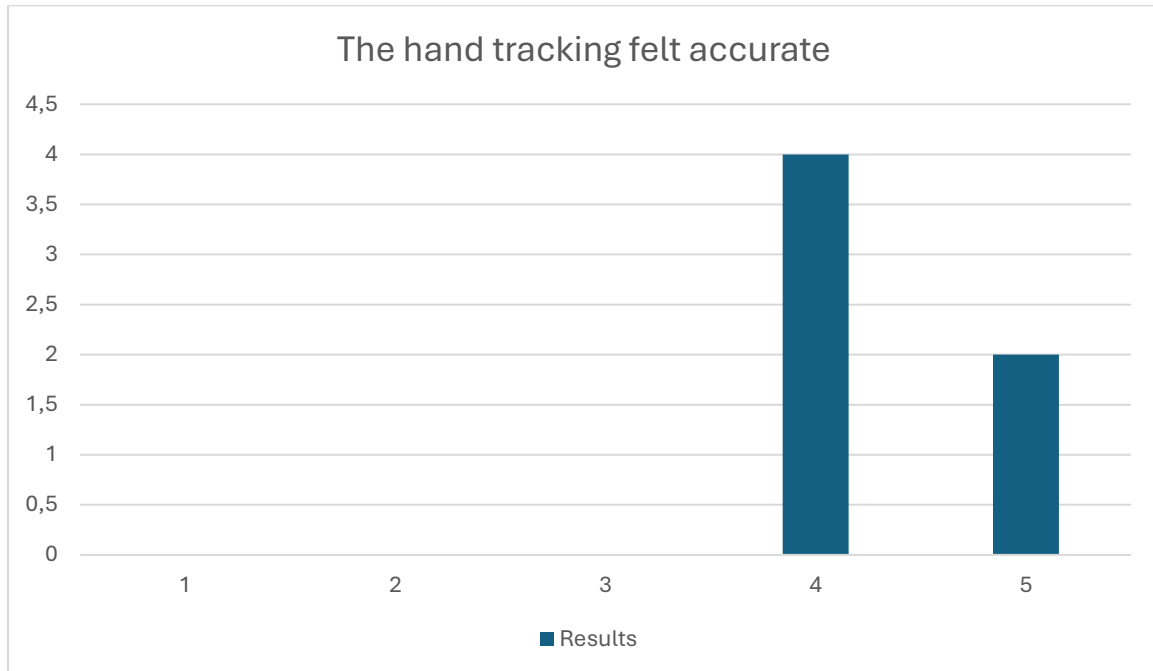

Comments:

- “What did you like most?”
- “What would you improve?”

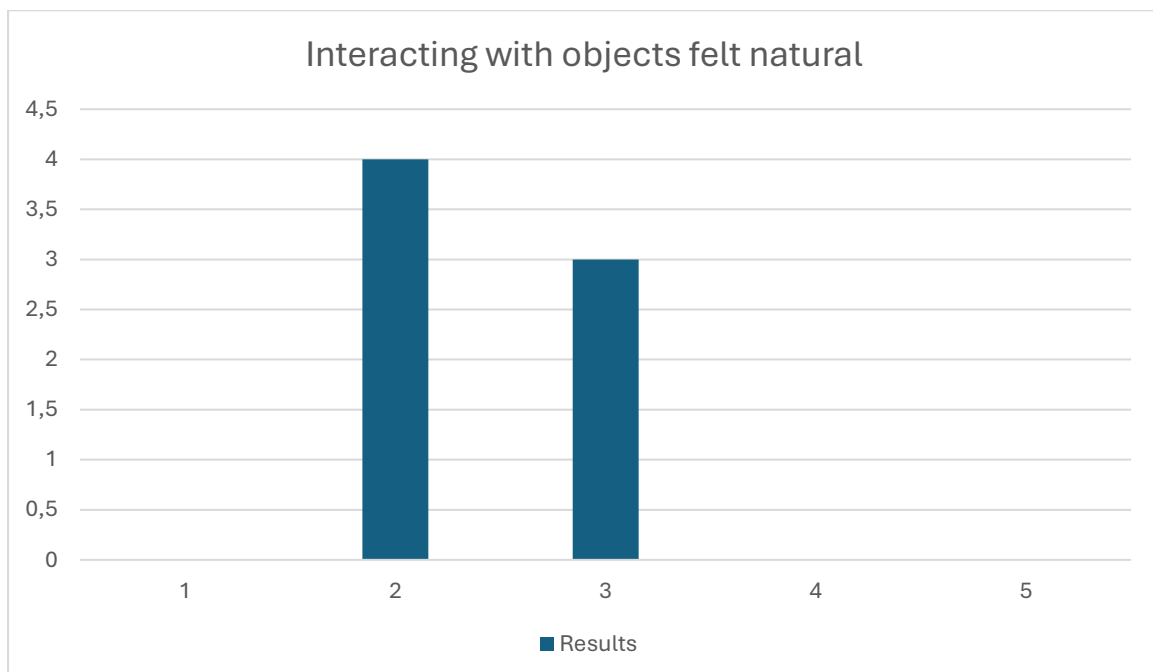

Appendix B

Likert scale questionnaire results

Hand Tracking

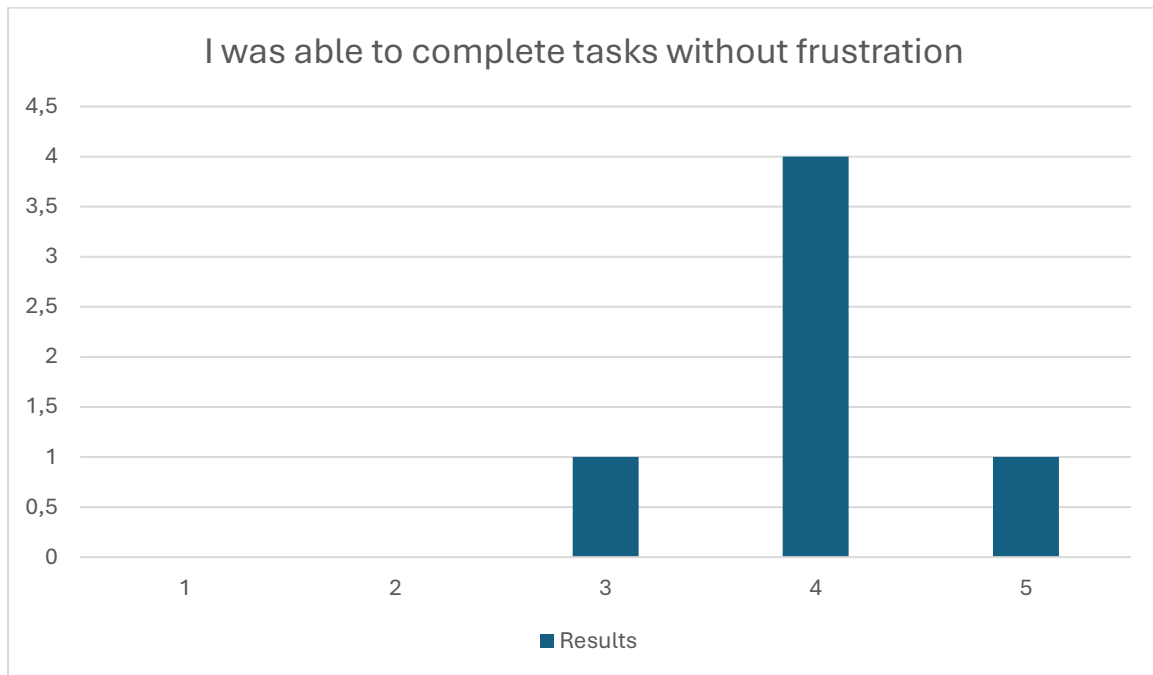

Average: 4.30

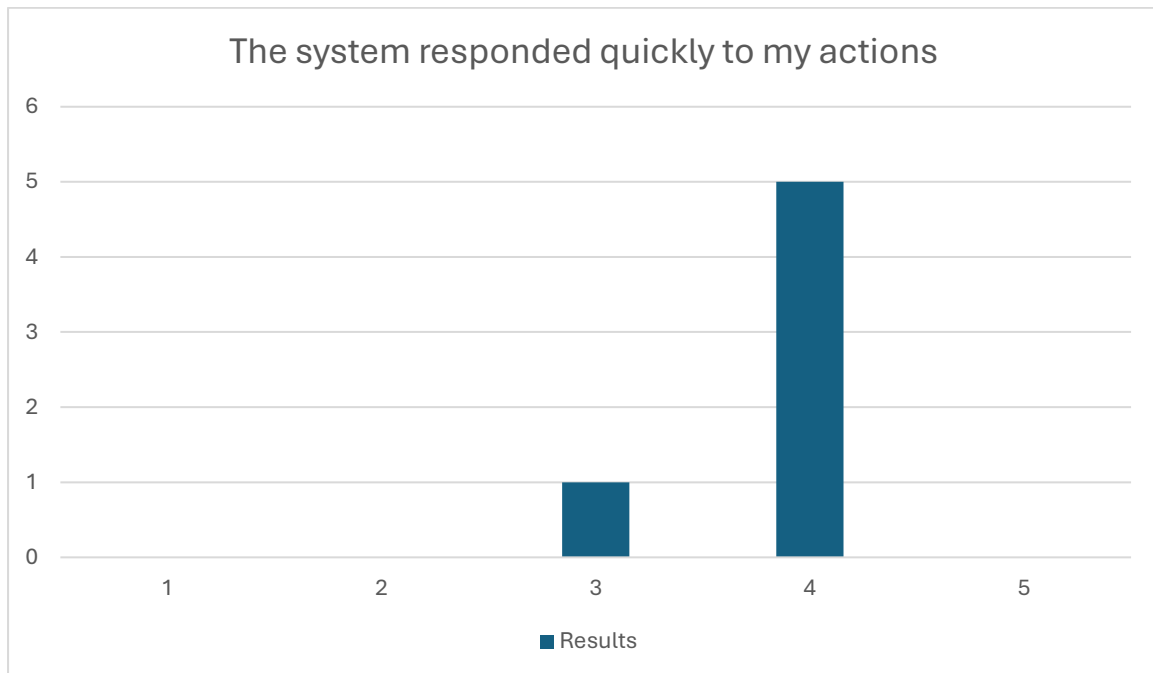

Average: 2.83

Category average: 3.33

Efficiency

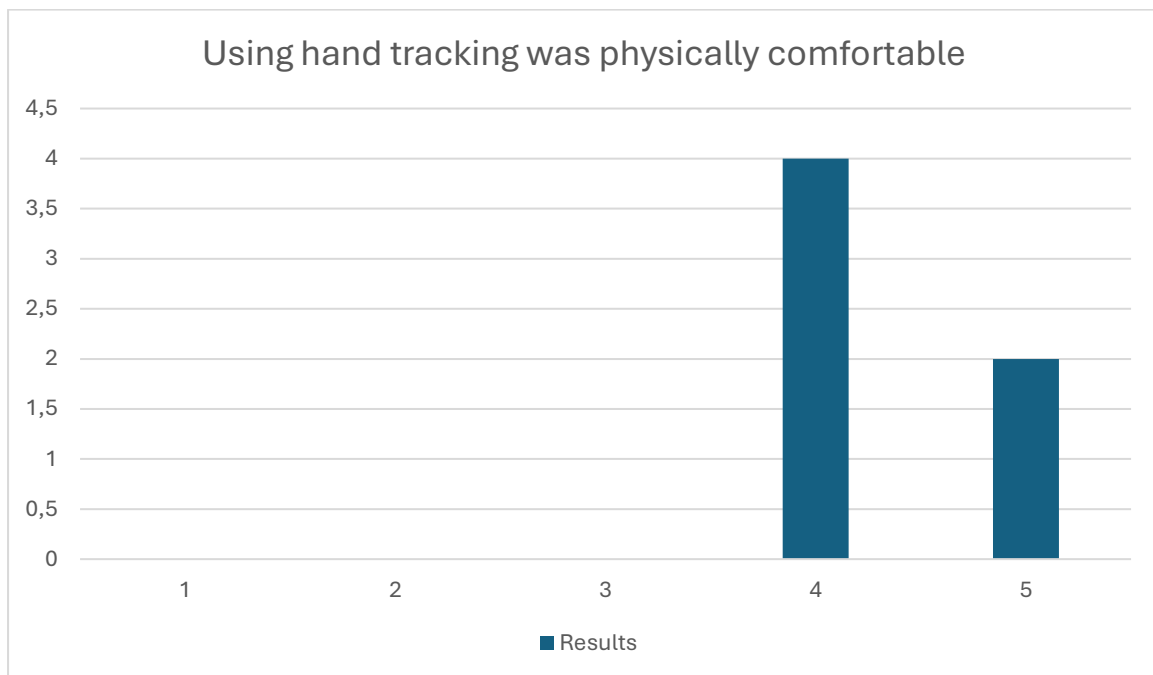

Average: 4.00

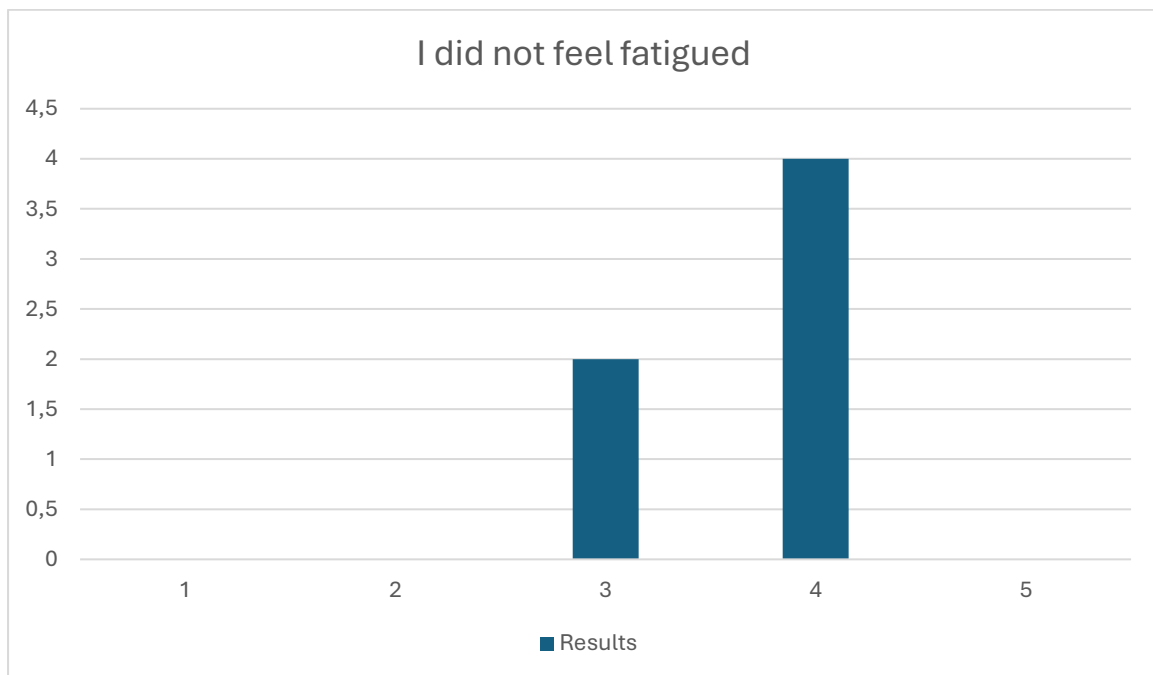

Average: 3.83

Category average: 3.91

Comfort

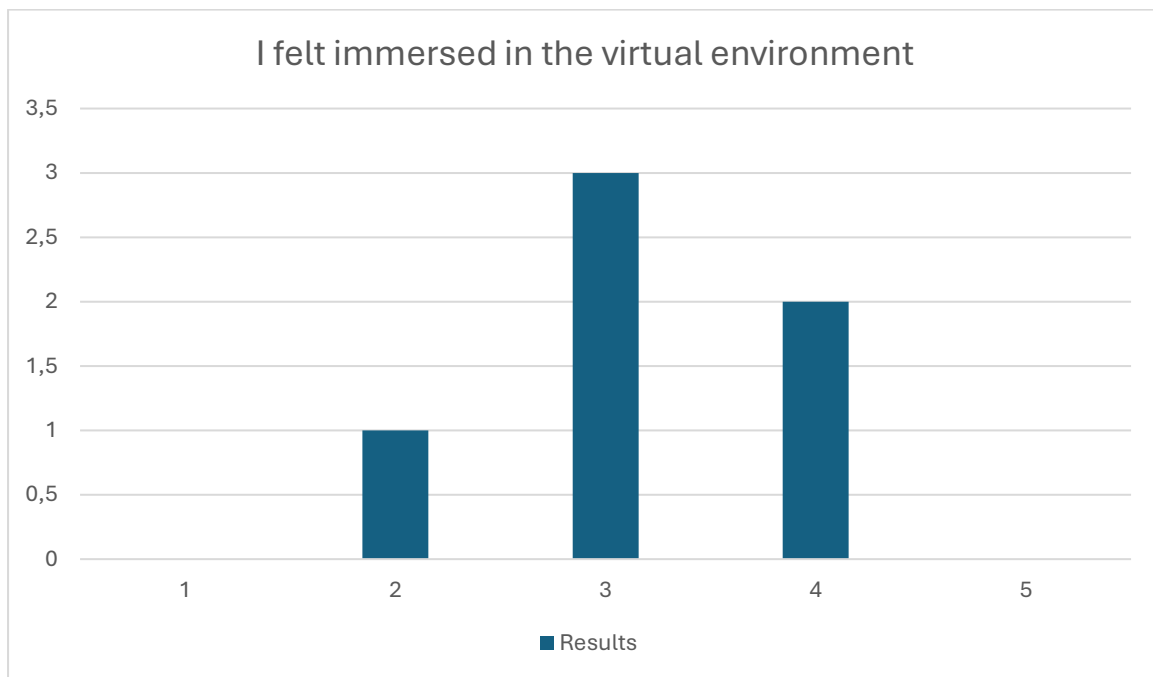

Average: 4.33

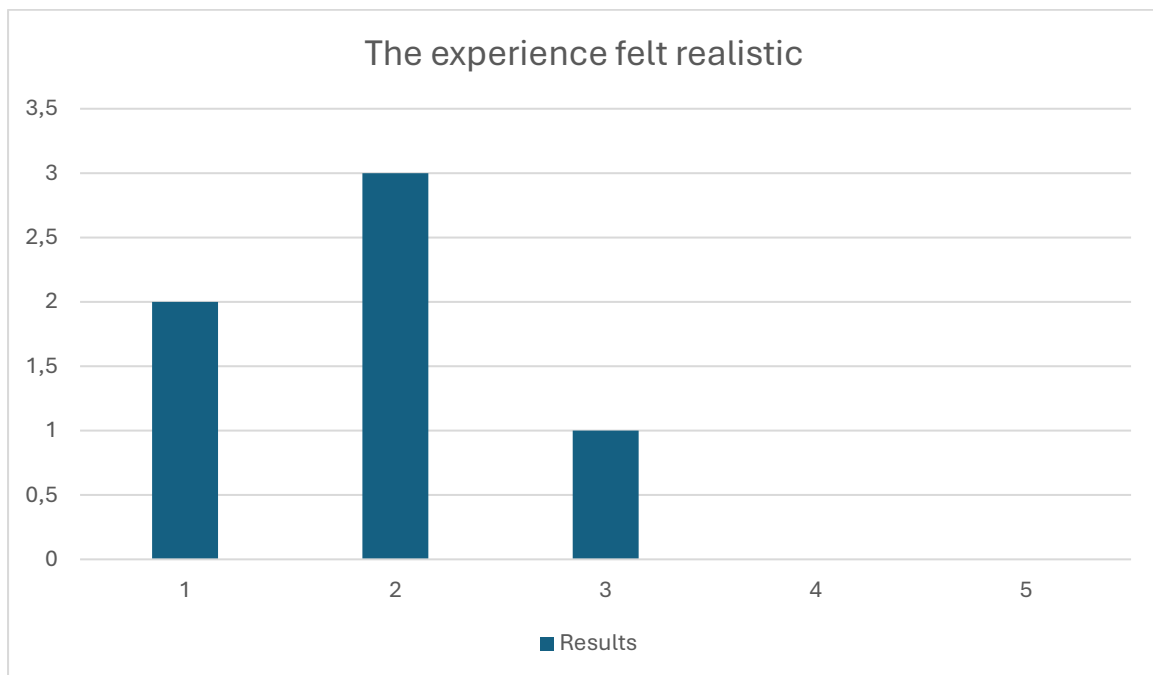

Average: 3.67

Category average: 4.00

Immersion

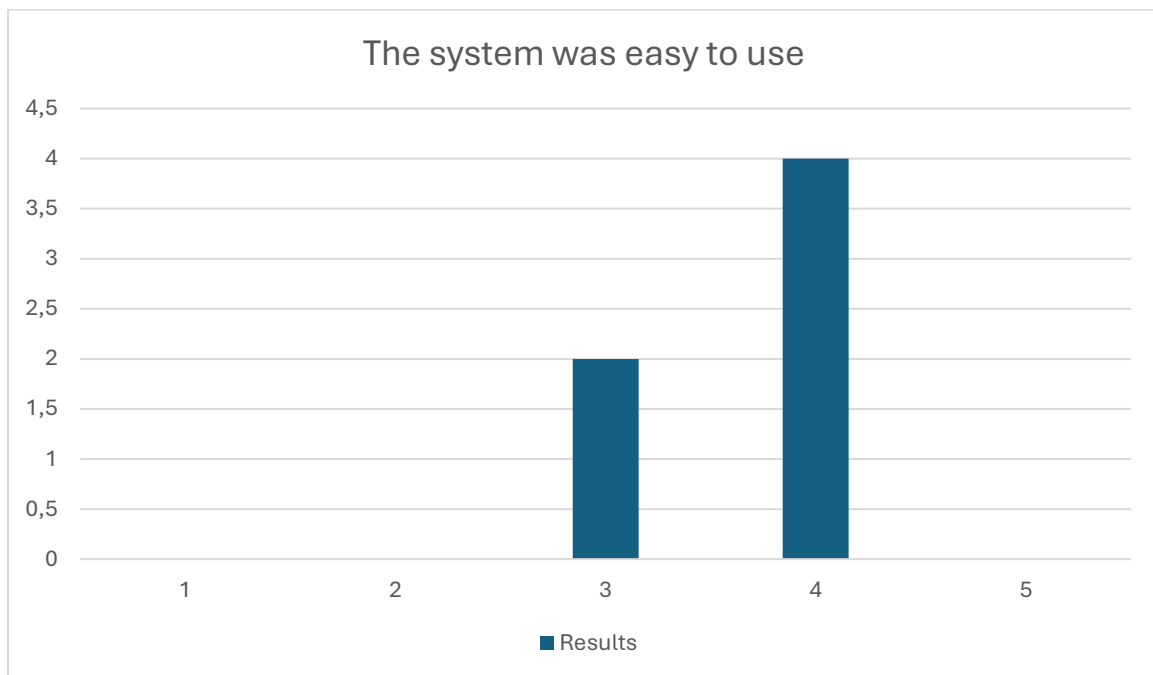

Average: 3.16

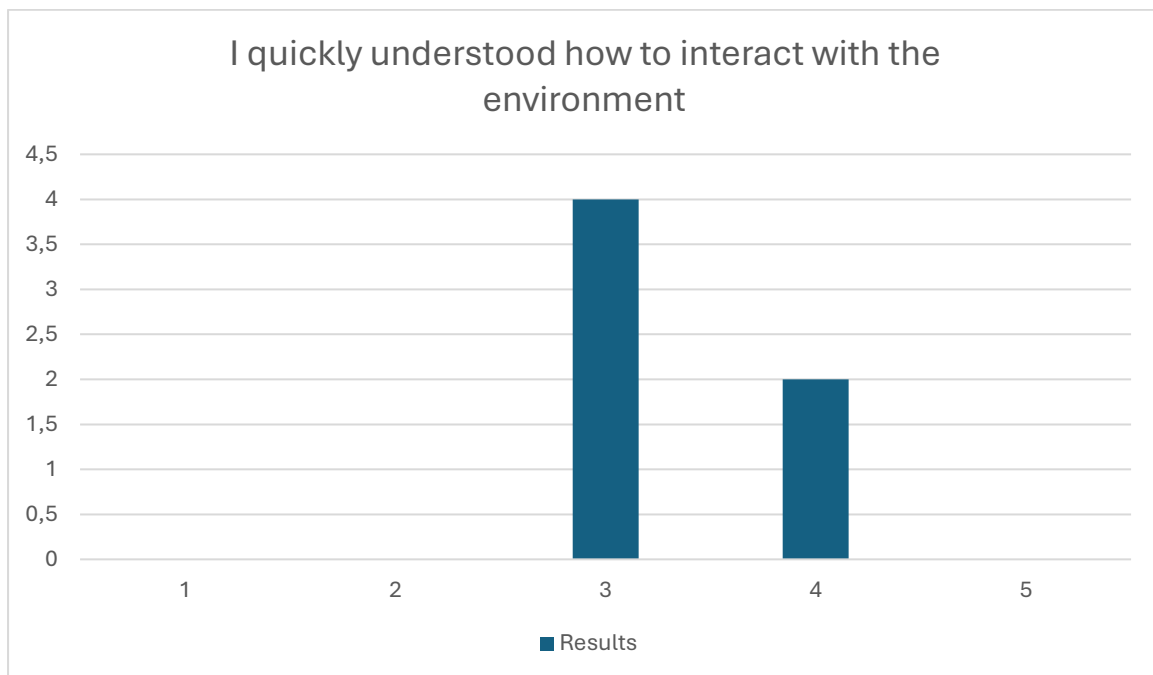

Average: 1.83

Category average: 2.50

Ease of Use

Average: 3.67

Average: 3.33

Category average: 3.50
